

Product Name
Clayette

Product Description

Clayette is a sulfur-free modeling clay. It is non-hardening, odor-free and flexible without being sticky.

Color

Off white

Handling tips

Using small amounts of citrus-based solvents, lighter fluid, latex paint removers, turpentine or mineral spirits as a lubricant on the surface of the clay will help to attain a smooth surface.

Unique Properties

Clayette will not oxidize and can be left out or heated and cooled repeatedly without any significant change in the product. Unlike NSP, Clayette will not melt when heated over 300 degrees F.

Firmness

Clayette is available in soft, medium and hard. On a scale of 1-10 the soft would be a 2, the medium a 4 and the hard would be a 6 (see our catalog).

Clayette is generally used at room temperature but can be warmed to soften.

Wash hands with soap and water after use.
